

Amendments to the Claims:

Please amend the claims to read as follows:

1-19 (Cancelled)

20. (Previously presented) A composition comprising a combination of plant matter from Ginkgo Biloba and plant matter from a plant of the genus *Uncaria*, species *tomentosa*, further in combination with one or more substances selected from the group consisting of Ginseng, Echinacea, Vitamin E, Selenium, Niacin or nicotinate, Folic acid, Vitamin B12, and Choline.

21. (Previously presented) A composition comprising plant matter from a plant of the genus *Uncaria*, species *tomentosa*, in combination with one or more substances selected from the group consisting of Dong Quai, Bilberry and Aloe Vera, and further comprising one or more substances selected from the group consisting of Chromium Polynicotinate, Selenium, Vitamin B12 or cobalamin, Folic acid, Biotin, and Thiamine HCl or vitamin B1

22. (Previously presented) A pharmacological agent comprising a therapeutically effective amount of a combination of Ginkgo Biloba and plant matter from a plant of the genus *Uncaria*, species *tomentosa*, in combination with a therapeutically effective amount of one or more substances selected from the group consisting of Ginseng, Echinacea, Vitamin E, Selenium, Niacin or nicotinate, Folic acid, Vitamin B12, and Choline, the plant matter and substance and the therapeutic amount of the plant matter and substance selected for efficacy in reducing, disrupting, dissolving, inhibiting, eliminating or preventing amyloid fibrils in a subject.

23. (Previously presented) A pharmacological agent comprising a therapeutically effective amount of plant matter from a plant of the genus *Uncaria*, species *tomentosa*, in combination with a therapeutically effective amount of one or more substances selected from the group consisting of Dong Quai, Bilberry and Aloe Vera, and a therapeutically effective amount of one or more substances selected from the group consisting of Chromium Polynicotinate, Selenium, Vitamin B12 or cobalamin, Folic acid, Biotin, and Thiamine HCl, or vitamin B1, the plant matter and substance and the therapeutic amount of the plant matter and substance selected for efficacy in reducing, disrupting, dissolving, inhibiting, eliminating or preventing amyloid fibrils in a subject.

24. (Previously presented) The pharmaceutical agent of claim 17 wherein the therapeutically effective amount of plant matter has an *in vitro* amyloid inhibitory activity or efficacy greater than 50%.

25. (Previously presented) The pharmaceutical agent of claim 19 wherein the therapeutically effective amount of plant matter has an *in vitro* amyloid inhibitory activity or efficacy greater than 50%.
